

JOINT TUFTS/MIT COSMOLOGY SEMINAR

Recent progress on the black hole information problem

Daniel Harlow
MIT

Building on a decade of developments related to holography and quantum information, in the last few years a framework for resolving Hawking's black hole information has been developed. In this talk I will give an overview of these developments, focused on conveying the general idea for how things work.

Tuesday, September 26, 2023, 2:30 pm
Cosman Seminar Room
Center for Theoretical Physics
Building 6C, Room 6C-442
Massachusetts Institute of Technology
